EXPERIENCE

Benri Ltd — Bashundhara Road, Dhaka
Full-Stack Web Developer (Full-time) — *Jul 2020 - Aug 2021*

- Designing and developing online apps and services with Laravel. Developed client websites and applications based on design hand off provided by lead designers. Designed modules that are efficient. Provided troubleshooting and technical support for clients and internal team members for launched projects and other IT-related issues such as Server Management, hosting and dependency configuration. Utilized GIT source control for projects.

Turtle Solution Limited — Niketon, Dhaka
Unity3d Game Developer (Full-time) — *Sep 2021 - Apr 2022*

- Take responsibility for all aspects of the game's lifespan, including product design and development.Working as part of the larger studio team, plan, create, and implement high-quality game features.Participate in the development process and offer suggestions and improvements, ensuring code quality across the whole production cycle.Participate in code reviews and the hiring process for future coworkers.

Infinity Infotech — Niketon, Dhaka
Full Stack Software Engineer (Full-time) — *June 2022 - Now*

- Developed full-stack web apps for processing data, analysis, and visualization. By analyzing system performance criteria, We were able to create a number of innovative software solutions for our projects. Assist the software support team in modifying programming to resolve production difficulties. Work closely with project coordinator to resolve software development concerns.

PROJECTS

- **Personalized videos feat. your favorite stars(React Native, MySQL, Laravel for Backend API)**: Personalized video message from your chosen celebrity, exclusively addressed to you. Worked as the front-end developer on this project. Worked with back-end developers and other developers to create cutting-edge applications for clients while maintaining privacy and security.

- **Multi-vendor E-commerce Platform (Angular v14(Admin Panel), Laravel(API), React Native(User Panel))**: A multi-vendor eCommerce platform is a ready-to-use solution for creating online marketplaces where multiple sellers can sell their goods.

- **eLearning Platform (Angular v14(Admin Panel), Lumen(API), Laravel(User Panel))**: This LMS platform is a comprehensive collection of interactive online services that give information, tools, and resources to educators, trainers, learners, Orion's, Marvel, and anyone involved with education.

- **Cryptocurrency Trading Site(NodeJS, Laravel, MySQL, Binance API, Bootstrap5)**: A crypto trading platform on which you can buy and sell cryptocurrency. To get the realtime price, we used the Binance API.In this site, I worked as a full stack developer.Users and the backend features are being tested.Client feedback is used to scale initiatives.

- **HOWZAAT Mushi The Dependable (Unity3d Game Engine, C#, Sourcetree)**: Bangladeshi cricket legend Mushfiqur Rahim's official mobile cricket game. Worked as a project lead and developed several features.

VOLUNTEER EXPERIENCE

- **Involved in arranging National High School Programming Contest at Campus** — SUST, Sylhet
  Conducted online and offline technical & soft-skills training impacting over 3000 students. — *Dec 2016*
